

Fujitsu launches new company 1FINITY to strengthen network products business

Shaping the future of telecommunications infrastructure for a connected society

Kawasaki, Japan, April 24, 2025 – Fujitsu Limited today announced that it will transfer its network products (photonics and mobile systems) business to new company 1FINITY Inc. The new company, scheduled for formation on July 1, 2025, will be a wholly owned subsidiary of Fujitsu Limited. By consolidating its network-related operations into 1FINITY, Fujitsu aims to deliver high-quality, competitive network solutions globally and contribute to the evolution of telecommunications infrastructure that supports societal foundations.

Fujitsu's Medium-Term Management Plan, announced on May 24, 2023, envisions the company transforming into "a technology company that realizes net positive through digital services" by 2030. To realize this vision, Fujitsu has identified "Business Model and Portfolio" as one of its key strategies, positioning the three years up to 2025 as a period for building a model for sustainable growth and improved profitability. The establishment of 1FINITY is a strategic initiative in line with this Medium-Term Management Plan. Fujitsu aims to strengthen the network products business while clarifying management responsibility and accelerating the decision-making process towards the growth of global business and expansion. It is 1FINITY's goal to respond quickly to the rapidly changing market environment and create innovation through the timely provision of products that maximize the use of cutting-edge technology, shifting to software technology, and expanding into the AI data center market.

This establishment of this new company will allow both Fujitsu and 1FINITY to leverage their respective strengths, and empower the Fujitsu Group as a whole to provide total solutions that support the transformation of society and the corporate sector, thereby leading to improved value for customers.

About the new formation

1. Transfer and integration of the network products business into 1FINITY

The functions encompassing the development, manufacturing, sales, implementation support (design, construction), maintenance, and operation of network hardware, primarily optical transmission equipment and O-RAN compliant 5G base station equipment, as well as related software (Virtuora series), and the research function for 6G, will be consolidated into 1FINITY. In conjunction, related employees, including those involved in the telecommunications carrier business of Fujitsu Network Solutions Limited, will be consolidated into 1FINITY.

2. Integration of Group companies related to the network products business and their functions into 1FINITY

Fujitsu plans to transfer four of its Group companies and their related companies to 1FINITY: Fujitsu Telecom Networks Limited, Fujitsu Network Service Engineering Limited, Mobile Techno Corporation, and

Fujitsu Network Communications, Inc. Each Group company will continue providing their products and services even after integration into 1FINITY. The company names of the Group companies to be transferred after July 2025 are yet to be determined.

About the new company's initiatives

1FINITY will focus on promoting the following three areas:

1. Global business growth and expansion

Through 1FINITY, Fujitsu aims to expand its share of the global network products market and achieve business growth. On the foundation of strengthening business in Japan and North America, 1FINITY will actively expand into the European and Asian markets. While strengthening partnerships to expand sales networks, the company will increase its business domain by approaching new customer segments such as cloud infrastructure companies.

2. Strengthening competitiveness

1FINITY will strengthen competitiveness through the development of high-quality products that leverage its core technological capabilities, such as world-class high-capacity optical data transmission and reception technology and the technological development of high-performance vRAN software that employs GPUs. Additionally, 1FINITY will streamline overall processes through a consistent management system from research and development to manufacturing, operation, and maintenance, and strengthen sustainable cost competitiveness using AI and software.

3. Take on new challenges

1FINITY will strive to provide high value to its customers as a supplier of advanced network operations utilizing new technologies such as AI, and next-generation communication systems such as 6G and IOWN. Furthermore, 1FINITY will strengthen Fujitsu's portfolio by actively enhancing software products and collaborating with partners, aiming for growth in new areas as well.

About the new company's name

The name 1FINITY embodies Fujitsu's desire to become "number one" in network technology and the market and to explore "infinite" possibilities with customers while carrying out business in a sustainable manner.

1FINITY is already in use as a brand for Fujitsu's optical transmission products. Going forward, Fujitsu will unify the hardware, software, and services provided under the 1FINITY name and enhance Fujitsu's global presence, build broad partnerships, and establish 1FINITY as a portfolio brand.

About 1FINITY Inc. (tentative)

- **Company name:** 1FINITY Co., Ltd. (English notation: 1FINITY Inc.)
- **Launch date:** July 1, 2025
